Goal:
I'm looking for opportunities as a Junior Programmer to apply my knowledge in web development and contribute to the growth of innovative projects. I have experience in HTML, CSS, JavaScript , TypeScript , Node.js and React .

Academic education:
Technical Course in Software Development – DevClub
Period: [15/11/2022] - [17/01/2024]

Technical abilities:
- Programming languages: HTML, CSS, JavaScript , TypeScript
- Frameworks: Node.js, React
- Knowledge of Git and version control
- Experience in developing responsive web applications
- Familiarity with agile methodologies (Scrum, Kanban)
- Knowledge of Docker and Linux.
- Basic knowledge of databases (MySQL, MongoDB , Postgres)

Professional experience:

Junior Programmer - Freelancer
- Participation in the development of a project management system using React and Node.js
- Collaboration in the creation of reusable components to optimize the development of future projects
- Integration of external APIs to provide additional features to the system

Personal Projects:

Project: Online Portfolio: https://portfolio-edgarsousa.netlify.app/
- Development of a personal website to showcase projects and skills
- Use of HTML, CSS, JavaScript and React to create an interactive and responsive experience

Languages:
- Native Portuguese
- Basic English

Additional Information:
- Availability to learn new technologies and participate in training
- Ability to work in a team and contribute to a collaborative environment
- Ease of solving problems and making decisions in dynamic environments
